# Improve Patient Experience with Saama and Microsoft Azure

MICROSOFT AZURE APP BUILDER PROFILE: SAAMA TECHNOLOGIES

Saama's comprehensive, big data solution for healthcare providers identifies priority patient concerns, produces key strategic insights, and delivers optimal strategies for each hospital's unique demographic base. We help create a better patient experience. All in the cloud.

WHAT WE OFFER

Deeper Insights through Advanced Analytics

- Deep drill analysis of all relevant complex data sets
- NLP and scoring algorithms through automatic learning procedures
- Powerful insights to prioritize strategies
- Leverage successful, proven strategies

Big Data & Advanced Analytics Solution

- Merges comprehensive healthcare data from internal and external, structured and unstructured sources, including social media and internal surveys
- Draws actionable insights through data science, from any healthcare dataset

Customized, Intuitive Dashboards

- Visual Fluid Analytics Engine drives the development of key strategic insights
- Intelligent information gathering within powerful, cloud-based data model
- Deploying best-of-breed technologies, leveraging your existing architecture

Experienced Healthcare Consultants

- Develop valuable, key strategic insights and best practices
- Leverage Saama's proprietary Patient Care Value Chain Framework
- Analyze competitive benchmarks and healthcare issues

SPEED AND SPECIFICITY FOR DISRUPTIVE BUSINESS OUTCOMES

Saama's Patient Experience is based on Saama's Fluid Analytics Engine (FAE). FAE democratizes data science and helps accelerate development of data solutions that help businesses convert traditional BI predictive insights into advanced analytics prescriptive actions. The unique IP is the direct result of years of experience building thousands of analytics enabled solutions across multiple industries.

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
